LEARNING OUTCOMES

- Apply relevant safety regulations and industry standards to plan and execute well workover operations.
- Analyze well conditions and workover requirements to select appropriate equipment and procedures.
- Evaluate workover risks and implement control measures to mitigate potential hazards.
- Design a workover program that integrates operational steps, resource allocation, and contingency planning.
- Demonstrate effective communication and teamwork during workover operations to ensure coordination and safety.
- Implement monitoring and evaluation techniques to assess the success of workover operations and recommend improvements.

WHO SHOULD ATTEND

- This course is designed for well operations personnel, including workover supervisors, rig operators, and field technicians, who are involved in well intervention and maintenance activities.
- It is also suitable for engineers and technical staff seeking to enhance their understanding of workover operations.

COURSE OUTLINE

Day 1: **Workover Fundamentals and Well Control Principles**

- Introduction to well workover: definitions, objectives, and typical scenarios.
- Types of workover operations: through-tubing, rig workover, and snubbing.
- Workover rig components: hoisting, rotating, and circulation systems.
- Well control fundamentals: primary and secondary barriers, BOP stack, and well control drills.
- Well integrity and pressure management: monitoring, kill procedures, and contingency planning.
- Safety and environmental compliance: HSE regulations, permit-to-work systems, and emergency response.
- Overview of well problems: sand production, water cut, mechanical failures, and formation damage.

Day 2: **Workover Planning, Execution, and Problem-Solving**

- Workover planning: data review, well history, and job design.
- Rig site preparation and equipment selection.
- Tubing and packer retrieval techniques.
- Recompletion and zone isolation methods.
- Well stimulation: acidizing and hydraulic fracturing basics.
- Sand control and artificial lift installation.
- Well testing and production logging for evaluation.
- Post-workover monitoring and reporting.
