Duration	1 day
Training Method	Online, On-Campus, In-House
Certificate	Issued via AATICD LMS – verifiable online

LEARNING OUTCOMES

- Demonstrate the correct use of hand and power tools for removing automotive components.
- Apply safety procedures and personal protective equipment (PPE) during component removal.
- Identify and remove specified automotive components according to manufacturer specifications.
- Inspect removed components for wear or damage and report findings.
- Dispose of removed components and materials in an environmentally responsible manner.

WHO SHOULD ATTEND

- This course is designed for automotive technicians, mechanics, and apprentices who need to develop or refine their skills in removing vehicle components.
- It is also suitable for workshop supervisors seeking to standardize removal procedures.

COURSE OUTLINE

Day 1: Foundational Principles of Automotive Component Removal

- Introduction to automotive systems and component identification
- Workshop safety: PPE, hazard awareness, and safe work practices
- Tools and equipment: selecting and using hand tools, power tools, and lifting devices
- Pre-removal inspection: visual checks, fluid levels, and component integrity
- Step-by-step removal of a non-complex component (e.g., battery or air filter)
- Documentation: completing removal records and incident reporting
- Practical demonstration and supervised hands-on practice
- Assessment: written test and observed removal task
