## LEARNING OUTCOMES

- Describe the materials used in firearm stock construction, including wood, synthetic polymers, and composites.
- Explain the design principles of firearm stocks, including length of pull, drop at heel and comb, and cast-off.
- Identify the manufacturing processes for different stock types, such as carving, injection molding, and laminating.
- Evaluate the impact of stock construction on firearm accuracy, ergonomics, and recoil management.
- Demonstrate knowledge of stock fitting techniques to ensure proper alignment and safety.
- Analyze the safety considerations related to stock construction, including stress points and material durability.

## WHO SHOULD ATTEND

- This course is intended for firearms manufacturers, gunsmiths, firearm trainers, and individuals involved in firearm maintenance or assembly who need to understand stock construction.
