LEARNING OUTCOMES

- Analyse the nature and characteristics of natural, human, and economic resources in South Africa.
- Evaluate the spatial distribution patterns of key resources across South African regions.
- Apply spatial analysis techniques to interpret resource-related patterns and trends.
- Assess the socio-economic and environmental implications of resource distribution.
- Develop recommendations for sustainable resource management based on spatial analysis.
- Demonstrate the ability to communicate spatial resource information effectively.

WHO SHOULD ATTEND

- This course is designed for professionals in urban and regional planning, environmental management, economic development, and GIS, as well as students and researchers seeking to understand South Africa's resource geography.

COURSE OUTLINE

Day 1: Analysing Spatial Patterns of Resources in South Africa

- Introduction to natural resources: renewable vs non-renewable, and their importance.
- Overview of South Africa's resource endowment: minerals (gold, platinum, coal), water resources, agricultural land, and energy sources.
- Spatial distribution maps: identifying resource-rich provinces (e.g., Gauteng for minerals, Mpumalanga for coal).
- Factors influencing resource location: geology, climate, and historical land use.
- Economic activities linked to resources: mining, agriculture, and energy production.
- Spatial patterns: core-periphery model and regional disparities.
- Environmental impacts: resource depletion, pollution, and land degradation.
- Policy implications: resource management and sustainable development strategies.
